

This series introduces the orgvue platform. You will learn the fundamental skills needed to successfully get started with orgvue, including basic navigation and how to begin working with data.

Included Courses

navigating orgvue

This course will introduce you to the orgvue homescreen. We will show you how to log into orgvue, access the homescreen, and begin navigating your organization's data.

visualizing your data in orgvue

This course will introduce you to the visualizations available within orgvue packs. We will explain how orgvue standard packs accelerate speed to insight and explore the different slide types available in a pack.

cleaning your data in orgvue

This course will demonstrate how to use standard data cleaning packs to review and clean data to 'create one version of truth' for organizational design and planning.

analyzing your data in orgvue

This course will demonstrate how to use standard story packs to perform an analysis of the structure, size, cost, and composition of your organization.

How to Access

Courses are available in our learning portal

This series introduces the orgvue platform. You will learn the fundamental skills needed to successfully get started with orgvue, including basic navigation and how to begin working with data.

Included Courses

modelling scenarios

This course will demonstrate how to use standard story packs to perform an analysis of the structure, size, cost, and composition of your organization.

practicing orgvue fundamentals

In this course, you will practice analyzing the distribution of employees across spans of control and organizational layers. Using what you've learned throughout this series, you will take targeted action to improve organizational effectiveness.

exploring orgvue fundamentals*

This live workshop will explore and reinforce key concepts from orgvue fundamentals. You will share your insights from the self-directed material, engage in group discussion, and practice applying what you learned in real-world scenarios.

*Registration for live workshops with an experienced facilitator is available in the learning portal and requires the completion of self-directed content prior to registration. Workshops are open enrollment, limited to 20 seats per workshop.
